Hello ,

thanks for your visit at oldcomputers and looking for the Zilog Z280 manual.

Now I've got the manual by a nice collector and made a new scan in better quality. The old scans are removed. For download of the new files please goto:

Greetings

oldcomputers.dyndns.org

This was scanned in 8/2016 and is complete.

This was scanned years ago and has some missing or bad pages. I added some of them but I prefer the version on the left.

As the paper is in bad quality the only way to preserve is to scan page for page. For that I had to destroy the binding of the book. That doesn't matter as I'm collecting informations - not books.
