Remote GSM Antenna	-
Phone Cable	-
Documentation	-

REQUIREMENTS

GSM SIM Card
Cellular Service

WHAT IS THE C3?

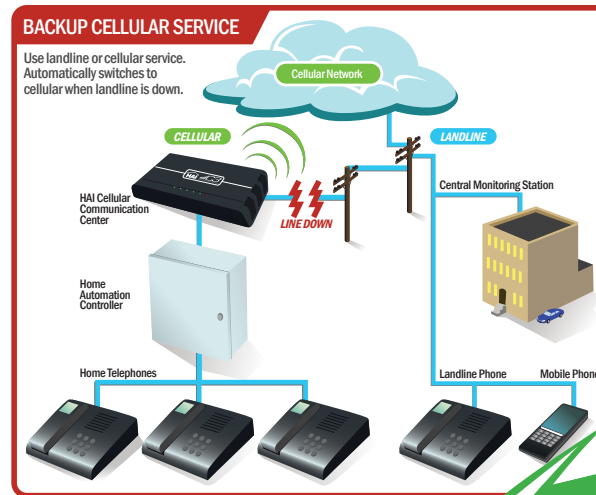

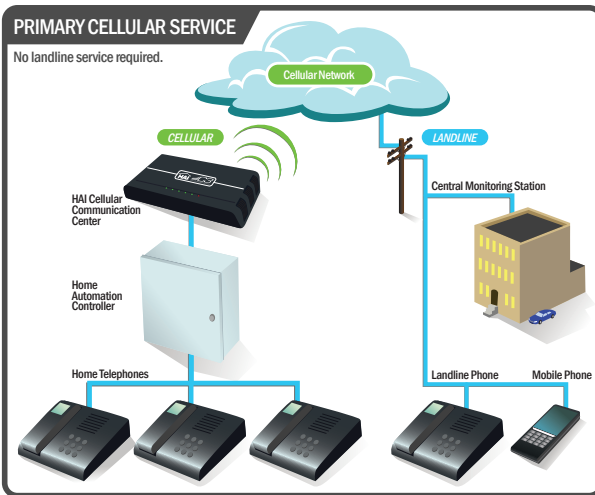

HAI's wireless cellular communicator that allows phone calls to be made over the GSM cellular network using the existing telephones in a home. The C3 can be used when there is no landline in the home or the landline is temporarily unavailable.

NO PROGRAMMING REQUIRED!

Simply insert a cellular SIM card, install the backup battery, plug in the provided AC adapter and antenna, and connect to a phone jack. Now the phones throughout the home—and the home's security panel—can make and receive phone calls via a GSM cellular network even if the landline phone system is not operating.

IMPRESSIVE FEATURES

- Quad Band GSM 850/900/1800/1900MHz
- Functions as primary or backup service
- Monitors landline. Switches to cellular when line is out
- Full telephone line (PSTN) simulation
- If tied to a security system, reports to central station
- Station can call homeowners via C3 to verify alarm
- Supports prepaid GSM SIM cards
- Built-in battery charger auto charges backup battery

Works with most standard security panels!
