

The C3 Cellular Communications Center is a wireless cellular communicator that allows phone calls to be made over the GSM cellular network using the existing telephones in your home. The C3 can be used when there is no landline in your home or the landline is temporarily unavailable.

FEATURES

- Quad Band GSM 850/900/1800/1900MHz

- Functions as either primary or backup phone service

- Monitors landline and switches to cellular when landline is down

- Full telephone line (PSTN) simulation

- Use where landlines are not present

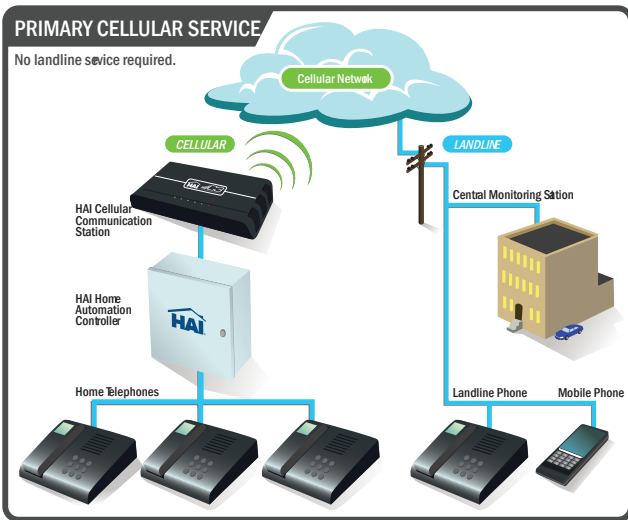

- When tied to a security system, reports to central monitoring station

- Supports prepaid GSM SIM cards

- Built-in battery charger automatically charges backup battery

MORE ONLINE:

The C3 allows any existing security panel to communicate alarm conditions using the GSM cellular network. The C3 checks the status of the existing PSTN telephone line and if it is unavailable, the C3 will emulate the line signal to the security panel. When an alarm occurs, the security panel will dial out using the GSM cellular network to communicate with the central monitoring station.

When the C3 is connected to the GSM cellular network, attached telephones can be used to make calls. If a landline is present, you will hear the normal dial tone and you can make your call as normal using the landline service. However, if the landline is currently unavailable, you will hear a different tone which indicates the C3 is in cellular mode and the call will be made using the cellular network. If the landline is available,

REAR VIEW

but you still want to make the call using the cellular network, when you pick up the phone and hear the normal dial tone, press the * key on the phone and the C3 will switch to GSM mode. At that point, you will hear the cellular mode tone and you can make the call using the GSM cellular network. When a call is made to the phone number assigned to the GSM SIM card that is installed in the C3, any phones that are connected to the C3 will ring as they normally would when a landline call is received.

INCLUDED WITH PACKAGE

C3 Cellular Communications Center	70A00-1
12VDC Power Adapter w/Power Cord	-
Backup Rechargeable Battery Pack	-
Remote GSM Antenna	-
Phone Cable	-
Documentation	-

REQUIREMENTS

- GSM SIM Card
- Cellular Service
