

EXTREME DUTY ARMORED DISCONNECT CABLE

Armored Cable Extensions With Connectors

- ◆ Quick Connect/Disconnect Feature
- ◆ For Use With G.R.I. Pull Apart Switch Sets
- ◆ Saves Time And Labor
- ◆ Extreme Duty For Harsh Applications

8775-26

The G.R.I. Extreme Duty Armored Cable Extensions with Connectors were designed for use with the G.R.I. Pull Apart switch sets, but can be used with a variety of our industrial and overhead contacts.

For applications where a longer cable run is necessary, the 26' extensions offer a clean and simple solution. The G.R.I. MS8774 (Magnasphere technology switch - higher security switch with more durability) and 8776 together make a complete security loop with armored cable.

By putting the G.R.I. 8775-26 extensions between the MS8774 and 8776, the overall length increases in 26' lengths, and allows a disconnect close to the piece of equipment you wish to remove rather than pulling cable through every item and stringing back again. For a bicycle display, golf carts, lawn equipment, truck docks or any moveable merchandise, run the cable in a manner that secures the products and wire to a zone on the security panel. Thread the cable through spokes, wheels and other natural openings to secure the products.

When the alarm zone is armed and there is a compromise in the line either by cutting, disconnecting or pulling apart, an alarm condition will exist.
