

Add-a-Motor infrared (IR) remote control tracks for window drapery and home theater curtains.

NEW CONTROL FEATURE.

Hardwire to Crestron and other 3rd-party contact-closure controllers via included jack, plug and cables.

Features and benefits:

- ✓ **New feature permits hardwire connection to 3rd-party devices that have timer controlled dry contact relays.** These controllers can open and close drapery on a time schedule, and that can save energy at windows – enhance home security – mask theater screens - open a theater curtain while dimming the room lights, and more. Motor can also be controlled by IR emitter, and learning remote control.
- ✓ **Heavy duty motors offer quiet, reliable operation.** Electronic adjustment can increase motor power to gather heavy fabric into a smaller pocket.
- ✓ **Precision engineered and approved for commercial & residential use.** Supplied with roller-carriers for smooth operation. Carrier eyelets accept customer's curtain pins and hangers.
- ✓ Includes infrared (IR) remote control, batteries, wall control switch (no AC wiring needed), wall and ceiling mounting hardware, and UL listed AC-DC power supply with 12' cord.
- ✓ Hinged track is folded and packaged in a 66 x 4 x 4 inch carton to reduce shipping cost. Design offers easy installation. Simply "unfold" and tighten connecting-joints. Aluminum track can be cut to the desired length. Motor can be oriented on either end of track.
- ✓ Ideal for home theatres, window treatments, church baptisteries, convention booth curtains.
- ✓ Add-a-Motor quality, reliability and customer service. One-year warranty.

All tracks are center-opening. User can convert to 1-way opening if desired.

Special Order: Factory supplied 1-way open. Add \$25.⁰⁰ each track.
