

Movie Night

Lighting Control Upgrade

Featuring Vizia RF +™

Problem: Adjusting room lights for optimum viewing
Solution: Vizia RF + dims the lights for a superior show

Set the Stage for Dramatic Home Theater Lighting

When you think of the ideal home theater, you think of state-of-the-art multi-channel audio, bone thumping subwoofers and a super sized screen. But the experience isn't complete without cinema-style lighting. Vizia RF + controls are the key to spectacular special lighting effects that turn movie night into a blockbuster event. Just sit back and relax while the wireless control system sets light levels for maximum viewing pleasure.

The Solution Is Easy

The Vizia RF + Movie Night lighting control kit from Leviton lets you recreate cinema ambiance at home. Using patented wireless technology, Vizia RF + controls convert selected ceiling lights, table and floor lamp lights into an ensemble that dims lights up and down on command, and at variable speeds. You can set the lights for gradual 20-second fade and direct the eye to the screen to enjoy the show. Vizia RF + lighting controls add on-screen contrast, enhance the viewing experience and reduce eye fatigue, too.

Solution Benefits

- Fades lights for a striking cinema experience
- Controllable through select universal remotes
- Table lamp compatibility
- Speaks Z-Wave®
- Saves energy
- Adds value to your home

Installs in most new or previously owned homes

Leviton recommends installation by a professional installer or licensed electrician for optimum performance.

vizia rf +™

Movie Night Lighting Control Upgrade

The Vizia RF +™ Movie Night Lighting Control Upgrade will add value and function to your home.

This solution requires these components:

Some installations may vary due to previously installed components. Check with a professional installer for specific configuration options.

Quantity

RF Handheld Remote Controller Programmer

Dramatic lighting design is at your fingertips with a feature-packed controller that provides the capability to program the systems and group lights into areas. Dim all the lights, create ambiance or set the mood at the touch of a button. Additional features include scene creation, room-to-room profiles and more. Requires 2 AA batteries, not included.

Leviton requires at least 1 device per household. (Cat. No. VRCPG-BSG)

4-Button RF Scene Controller for Multi-Location Control with IR Remote Capability

IR remote capability and the ability to set the scene for 4 different lighting events make this controller a must-have for home theater lighting. The top four buttons on the controller provide ON/OFF switching of four scenes while the bottom button transmits DIM/BRIGHT commands to the most recently activated scene.

Leviton recommends at least 1 device for this application. (Cat. No. VRCS4-1L)

Note: Button labels are sold separately as an additional option. (VPSLB-S4W, in white)

600W Incandescent Scene Capable Dimmer

Versatile scene capable dimmer in the media room adds magic to lighting. Adjustable fade rate allows wall sconces, ceiling lights and more to slowly dim as the show begins. Also acts as a standard dimmer and can save energy.

Leviton recommends at least 1 device for this application. (Cat. No. VRI06-1L)

300W Scene Capable Plug-in Lamp Dimming Module

It's easy to include incandescent table and floor lamps as part of the scene. The Plug-in Lamp Module functions much like an adapter between the lamp cord and wall outlet. Once programmed, the module allows the lamp to be dimmed and brightened remotely as part of a scene or area.

Leviton recommends at least 2 devices for this application. (Cat. No. VRP03-1LW)

Other solutions and options are available to expand and upgrade your system. Ask your installation professional for suggestions.
