

AEON LABS – SMART ENERGY ILLUMINATOR

(Z-Wave Dimmable Lamp Module with Energy Monitoring Capabilities)

Product Overview:

The Aeon Labs Smart Energy Illuminator is a low-cost Z-Wave lamp module which can illuminate/dim the lamp to varying degrees and can report immediate wattage energy usage or kWh energy usage over a period of time. It can also be controlled by other Z-Wave devices to turn on/off/dim to save electricity when appropriate.

With an unobtrusive small form factor, the Aeon Labs Smart Energy Illuminator will not block other nearby plugs. It is available in both matte white and matte black colors.

Product Highlights:

- Low-cost Z-Wave energy monitor and on/off/dimming lamp module
- Small form factor that is not intrusive and does not block other outlets
- Firmware upgradeable in field by end-consumer
- Latest Z-Wave protocol and commands
- Optimized antenna range: 100+ feet tested
- Designed and built with gateway partners and end-consumers in mind
- Available in both matte white and matte black colors
- Certified/Available for USA, EU and Australian markets (UL, FCC, CE, C-TICK, ROHS)

Technical Specifications:

- USA: 120V 60Hz input, 300W or 2500mA maximum output
- EU: 250V 50Hz input, 625W or 2500mA maximum output
- AU: 240V 50Hz input, 600W or 2500mA maximum output
