Easy to Setup

No home control system or software is required for you to setup your lighting scenes on a Scene Switch.

The 4 scenes on a Scene Switch are easily set by first pressing the Scene Switch button that is to remember the scene, then setting the lights to the desired levels, and then quickly pressing the same Scene Switch button 5 times in a row. The button will flash to let you know that it has memorized the scene.

HAI Lighting Control (HLC) Stand-alone

HLC Products may work as stand-alone without a home control system; however, to get the most basic lighting control system you must add a Scene Switch, which can control up to 7 different switches.

Buttons on a Scene Switch may be custom engraved so that you may "name" the scene that each button controls. Scene Switches may be installed in the wall or in a table top cradle that plugs into any electrical outlet.

One method for single room lighting control is to replace your regular switches with HLC switches, add lamp modules to your lamps, and add a Scene Switch to set up scene control in a room.

Single Room Lighting Control, with No Programming.

For an easy to set up, fully scalable lighting control kit, use lamp modules, Scene Switches in Table Top Scene Switch Cradles, and the HLC Scene Switch Remote Control.

This stand-alone application is perfect for home theaters, great rooms, master bedrooms & baths, outdoor lighting, and many other possibilities.
Another method for single room lighting control is to use lamp modules, Scene Switches in Table Top Scene Switch Cradles, and the HLC Scene Switch Remote Control. This stand-alone application is perfect for home theaters, great rooms, master bedrooms & baths, outdoor lighting, and many other possibilities.

Examples

The following diagram demonstrates how HLC may be setup in a basic lighting control system by using a Scene Switch:

KITCHEN SWITCHES

KITCHEN
SCENE SWITCH

GREAT ROOM SWITCHES

SCENE SWITCH

In our example the Kitchen Switches and Great Room Switches are being controlled by Scene Switches. The switches assigned to a Scene Switch may be turned fully on, turned all off, or be set to 4 different scenes that involve different dimming levels.

Kitchen/Breakfast Room Scene Switch	Great Room Scene Switch
• **ON BUTTON** All lights on for setting the table or cleaning up. Full brightness allows you to see what you are doing. • **A BUTTON** Morning scene for cooking and eating breakfast before school/work. The lights are dimmed to provide gentle light to wake up and get moving. • **B BUTTON** Evening scene for dinner. The lights are set in a subdued setting perfect for casual dining. • **C BUTTON** Homework scene. Turns off most of the lights in the	• **ON BUTTON** Full brightness for finding those keys or remote. • **A BUTTON** A reading scene for glare-free reading. • **B BUTTON** Movie scene to adjust lights for best contrast on the wide-screen. • **C BUTTON** Party scene to adjust your lights for the proper party atmosphere. • **D BUTTON** Nightcap scene for evenings when a nightcap may be enjoyed by the fireplace.

kitchen, but fully illuminates the area over the breakfast room table.

- **D BUTTON**
  Birthday & Party scene. The lights are set to provide just enough light to enjoy the candles.

- **OFF BUTTON**
  All lights are turned off.

- **OFF BUTTON**
  All lights are turned off.
