

Photoelectric Smoke Detectors

System Sensor's i^{3™} series smoke detectors represent significant advancement in conventional detection. The i³ family is founded on three principles: installation ease, intelligence, and instant inspection.

Features

- Plug-in detector line, mounting base included
- Large wire entry port
- In-line terminals with SEMS screws
- Mounts to octagonal and single-gang backboxes, 4-square backboxes, or direct to ceiling
- Stop-Drop 'N Lock attachment to base
- Removable detector cover and chamber
- Built-in remote maintenance signaling
- Drift compensation and smoothing algorithms
- Simplified sensitivity measurement
- Wide angle, dual color LED indication
- Loop testing via EZ Walk feature
- Built-in test switch

Installation ease. The i³ line redefines installation ease with its plug-in design. This allows an installer to pre-wire the bases included with the heads. The large wire entry port and in-line terminals provide ample room for neatly routing the wiring inside the base. The base accommodates a variety of back box mounting methods, as well as direct mounting with drywall anchors. To complete the installation, i³ heads plug in to the base with a simple Stop-Drop 'N Lock[™] action.

Intelligence. i³ detectors offer a number of intelligent features to simplify testing and maintenance. Drift compensation and smoothing algorithms are standard with the i³ line to minimize nuisance alarms. Two-wire i³ detectors needing cleaning can generate a remote maintenance signal, when connected to the 2W-MOD2 loop test/maintenance module, or to a panel equipped with the i³ protocol. This signal is indicated by LEDs located at the module and the panel. The SENS-RDR, a wireless device, displays the sensitivity of i³ detectors in terms of percent per-foot-obscuration.

Instant inspection. The i³ series provides wide-angle red and green LED indicators for instant inspection of the detector's condition: normal standby, out-of-sensitivity, alarm, or freeze trouble. When connected to the 2W-MOD2 loop test/maintenance module or a panel with the i³ protocol, the EZ Walk loop test feature is available on two-wire i³ detectors. This feature verifies the initiating loop wiring by providing LED status indication at each detector.

i Smoke Detector Specifications

Architectural/Engineering Specifications

Smoke detector shall be a System Sensor i³ Series model number______, listed to Underwriters Laboratories UL 268 for Fire Protection Signaling Systems. The detector shall be a photoelectric type (Model 2W-B, 4W-B) or a combination photoelectric/thermal (Model 2WT-B, 4WT-B) with thermal sensor rated at 135°F (57.2°C). The detector shall include a mounting base for mounting to 3½-inch and 4-inch octagonal, single gang, and 4-inch square back boxes with a plaster ring, or direct mount to the ceiling using drywall anchors. Wiring connections shall be made by means of SEMS screws. The detector shall allow pre-wiring of the base and the head shall be a plug-in type. The detector shall have a nominal sensitivity of 2.5 percent-per-foot nominal as measured in the UL smoke box. The detector shall be capable of automatically adjusting its sensitivity by means of drift compensation and smoothing algorithms. The detector shall provide dual color LED indication which blinks to indicate power up, normal standby, out of sensitivity, alarm, and freeze trouble (Model 2WT-B, 4WT-B) conditions. When used in conjunction with the 2W-MOD2 module, 2-wire models shall include a maintenance signal to indicate the need for maintenance at the alarm control panel, and shall provide a loop testing capability to verify the circuit without testing each detector individually.

Electrical Specifica	tions						
Operating Voltage	Minimu	Nominal: 12/24V non-polarized Minimum: 8.5V Maximum: 35V					
Maximum Ripple Vo	oltage 30% pe	30% peak to peak of applied voltage					
Standby Current	2-wire:	2-wire: 50 μ A maximum average; 4-wire: 50 μ A maximum average					
Maximum Alarm Cu	irrent 2-wire:	2-wire: 130 mA limited by control panel; 4-wire: 20 mA @12V, 23mA @ 24V					
Peak Standby Curre	ent 2-wire:	2-wire: 100 μA; 4-wire: n/a					
Alarm Contact Ratin	ngs 2-wire: r	2-wire: n/a; 4-wire: 0.5 A @ 30V AC/DC					
Physical Specificati	ions						
Dimensions (includ	ing base) 5.3 inch	5.3 inches (127 mm) diameter; 2.0 inches (51 mm) height					
Weight	6.3 oz. (6.3 oz. (178 grams)					
Operating Tempera	ture Range 2W-B ar	2W-B and 4W-B: 32°F–120°F (0°C–49°C); 2WT-B and 4WT-B: 32°F–100°F (0°C–37.8°C)					
Operating Humidity	y Range 0 to 95%	0 to 95% RH non-condensing					
Thermal Sensor	135°F (5	135°F (57.2°C) fixed					
Freeze Trouble	2WT-B a	2WT-B and 4WT-B only: 41°F (5°C)					
Sensitivity	2.5%/ft.	2.5%/ft. nominal					
Input Terminals	14–22 A	14-22 AWG					
Mounting	4-inch c Single g 4-inch s	3½-inch octagonal back box 4-inch octagonal back box Single gang back box 4-inch square back box with a plaster ring Direct mount to ceiling					
LED Modes			Power Up Sequence for LED Indi	cation			
LED Mode	Green LED	Red LED	Condition	Duration			
Power up	Blink every 10 seconds	Blink every 10 seconds	Initial LED status indication	80 seconds			
Normal (standby)	Blink every 5 seconds	off					

Out of sensitivity	off	Blink every 5 seconds
Freeze trouble	off	Blink every 10 seconds
Alarm	off	Solid

Ordering Information

Model	Thermal	Wiring	Alarm Current	
2W-B	No	2-wire	130 mA max. limited by control panel	
2WT-B	Yes	2-wire	130 mA max. limited by control panel	
4W-B	No	4-wire	20 mA @ 12V, 23mA @ 24V	
4WT-B	Yes	4-wire	20 mA @ 12V, 23mA @ 24V	
Accessories				
2W-MOD2	2-wire loop test / maintenance module		RT	Removal / replacement tool
SENS-RDR	Sensitivity reader		A77-AB2	Retrofit adapter bracket, 6.6 in. (16.76cm) diameter
